

SIMPLIFIED INSTRUCTIONS FOR TIE-DYED MASKS

MATERIALS

- Cotton Mask
- Gloves
- Permanent Markers
- Rubbing Alcohol
- Cup
- Dropper

INSTRUCTIONS

1. Gather your materials. You will need 1 cotton mask, 1 pair of gloves, a few permanent markers, 1 small cup of rubbing alcohol, and 1 dropper.
2. Put on your gloves. The gloves will protect your hands from marker stains and rubbing alcohol.
3. Lay your mask flat on your work surface and use your permanent markers to create a design on the mask. Large dots and lines usually work well, but you may draw any shape, image, or words that you like. Be creative in your design! (And be school-appropriate!)
4. Use your dropper to transfer rubbing alcohol from your cup to your mask. Drizzle the alcohol over your design to see how the colors spread and create a tie-dye effect on your mask. You will not need much alcohol to cover your mask, but you will discover that using a bit more alcohol will allow the colors to spread even more.
5. Let your mask dry. We recommend allowing your mask to set for at least three days before washing in order to keep the colors from fading. We do not recommend washing your mask with other clothes for its first wash.
6. Clean up your materials!
